

I am adamantly opposed to any attempt to weaken New Jersey's Do Not Call program. Our law is the toughest in the nation and it gives relief to our most vulnerable citizens-Senior Citizens, People with Limited English Proficiency and other citizens who do not have the ability to fully understand what they are saying yes to when a telemarketer calls. It minimizes the potential for fraud and protects our citizenry from scams. Our legislators should not be intimidated or bullied by companies that want to make a profit of our citizens, no matter what. We (the private citizen) should decide who we want to buy from when we want to buy and where, it should not be imposed upon us through hype and gimmicks.
